SUMMARY

MSF candidate with hands-on experience in budgeting, forecasting, financial reporting, account reconciliation, and cross-functional finance operations. Skilled in Excel financial modeling, variance analysis, Power BI, SQL, and valuation, with experience building decision-support analyses and AI-enabled reporting workflows.

PROFESSIONAL EXPERIENCE & PROJECTS

Center for Applied Transportation Sciences, University of Arizona

Tucson, Arizona

Student Intern— Operations & Finance Support

Nov. 2025 - Present

- Processed **30+ monthly financial transactions** (travel, procurement, reimbursements) using SAP Concur and University **ERP** system, ensuring full compliance with institutional financial policies and funding restrictions
- Supported budgeting, financial reporting, and account reconciliation across multiple funding sources, ensuring accurate transaction classification and object code assignment
- Collaborated with cross-functional units (Business Office, AP, external vendors) to resolve account classification, object code, and payment discrepancies

Tucson Federal Credit Union

Tucson, Arizona

Risk Management Intern

Jun. 2025 - Aug. 2025

- Reviewed **300+ dormant accounts and high-value transactions** under BSA/AML regulations and conducted **20+ risk assessments** and internal tests to identify financial and reputational risks
- Executed **50+ zero-balance account closures** in coordination with internal teams and fraud prevention protocols

Louisa Coffee

Taipei, Taiwan

Weekend Operations Manager

Jan. 2023 - Aug. 2024

- Managed **P&L performance**, inventory, supplier ordering, and cash reconciliation; implemented **cost controls** that reduced food and beverage expenses and improved net profit margin
- Supported **labor planning** and staffing decisions based on sales demand, operating coverage, and controllable labor expenses

Financial Analytics Portfolio

Selected Independent Projects

2026

- **TXN Three-Statement Model & DCF Valuation:** Built a driver-based three-statement financial model and five-year forecast for Texas Instruments using 10-K data; performed DCF valuation and scenario/sensitivity analysis to evaluate cash flow, capital spending, and funding needs
- **NorthBeam FP&A Budget vs. Actual Model:** Built a 12-month department-level Budget vs. Actual (BvA) model for a simulated B2B SaaS case, automating variance analysis, KPI reporting, favorable/unfavorable flags, and management commentary across four cost centers
- **Retail Financial Performance Analytics:** Developed a four-page Power BI dashboard with a star-schema data model and DAX time-intelligence measures for KPI, trend, profitability, and YoY performance analysis across regions, products, and customer segments
- **Olist E-Commerce SQL Analysis:** Analyzed 96K+ delivered e-commerce orders in MySQL using JOINS, CTEs, and window functions for Product Sales, trend, concentration, and delivery analysis; identified an ~8.1x higher one-star review rate for late orders

EDUCATION

University of Arizona, Eller College of Management

Tucson, Arizona

Master of Science in Finance (MSF)

Expected Dec. 2026

National Taipei University of Business

Taipei, Taiwan

Bachelor of Business Administration in Finance | GPA: 3.69

Graduated Jul. 2024

SKILLS
